

## *Amblystegium varium*

### **Common Name(s):**

moss, tree apron moss

### **Current Threat Status (2009):**

Range Restricted

### **Distribution:**

Indigenous. Australia and New Zealand. Known from the North Island (lower Waikato - Huntly Basin especially) and in the South Island from Arthurs Pass National Park.

### **Fruiting:**

Fruits have been observed and these seem to be sporadically produced throughout the year.

### **Threats:**

Not Threatened. Seeming rather uncommon and often confined to calcareous substrates within wetland systems.
