

## *Arisarum vulgare*

### **Common Name(s):**

friar's cowl

### **Current Threat Status (2009):**

Exotic

### **Distribution:**

Uncertain - first noticed as a garden escape in Auckland about 2004 (although there are much earlier (1950's) herbarium specimens of it lodged in the Auckland Herbarium which may be wild gatherings though the label information is unclear).

### **Habitat:**

Urban weed

### **Flowering:**

April - August

### **Fruiting:**

July - January
