

Choisya ternata

Common Name(s):

Mexican orange blossom

Habitat:

Prefers well-drained sunny sites. Withstands light frost.

Features:

"The flowers are star-shaped, 3–5 cm (1.2–2.0 in) diameter, with 4-7 white petals [mostly 5], 8-15 stamens and a green stigma; they are produced throughout the late spring and summer. The fruit is a leathery two to six sectioned capsule." Wikipedia

Flowering:

Spring and early summer
