

Begonia foliosa var. *miniata*

Common Name(s):

Fuchsia begonia

Habitat:

Lowland forest. One known location in NZ native forest - Bushy Park near Whanganui. This site was intact indigenous forest, remote from any planted exotic plants. The means by which this Begonia reached the site is unknown. Gardeners usually propagate this Begonia by cuttings but some authorities state it can be grown from seed, e.g. <https://www.rhs.org.uk/Plants/2009/Begonia-foliosa-var-miniata/Details>
