

Images still needed of exotic plants

Can you help us plug the last gaps in our exotic vascular flora image library? We have now illustrated 55% of New Zealand's exotic vascular plant species but we are still seeking images for 1164 plant taxa – see table below. If you can help us please send named images to the Network at info@nzpcn.org.nz, with the name of the photographer and details of where the image was taken. If you have multiple images please post them on a CD (NZPCN, PO Box 16-102, Wellington). Otherwise – here is a perfect photographers hit list for your spring field trip.
