										100	1.67																																																																																
CONDITION Fair - open understorey in places - Over use has lead to a degraded ground vegetation on steep slopes.																																																																																											
FENCING Good on boundary adjoining farmland. Adequate or unnecessary elsewhere under present adjacent land use.																																																																																											
PRIORITY Low for currently unfenced/poorly fenced portions of boundary unless the surrounding buffer zone of gorse is removed.																																																																																											
SCIENTIFIC 0.15 SCIENTIFIC Few bush remnants of original vegetation left in the Tawa District.																																																																																											
SCENIC A...																																																																																											
RECREATION ...																																																																																											
CONCLUSIONS and RECOMMENDATIONS This reserve is situated in a residential area and receives heavy use as a playing area for local children. Its small size renders it particularly vulnerable to understorey damage from intensive use of this type. Recent efforts to purchase gorse covered land on the southern boundary of the reserve have been unsuccessful. Acquisition of this land is important to ensure its future development back into forest, to act as a protective zone (e.g. from fire) for the present forest and to increase the diversity of habitats included in the reserve. An information notice emphasising the remnant nature of the reserve and briefly describing the vegetation should be posted at the entrance of the reserve. It should be pointed out to the public that this is the only reserved area of tawa in a borough where tawa forest was once the most common vegetation type.

¹ tall conifer: kahikatea, kauri, matai, miro, rimu, totara

² remaining 11 tree-sized spp

³ broadleaved

⁴ e.g. flax

⁵ incl. rough grassland, pasture etc

Indicator sp? but not T.P.

TREES AND SHRUBS

Native

Alectryon excelsus
Brachyglottis repanda
Coprosma grandifolia
C. repens
C. rhamnoides
C. robusta
Corynocarpus laevigatus
Dysosylum spectabile
Elaeocarpus dentatus

Fuchsia excorticata
Geniostoma rupestre var.
Hedycarya arborea
Leptospermum ericoides
Macropiper excelsum
Melicytus ramiflorus
Myrsine australis
Pennatia corymbosa

Podocarpus dacrydioides
 (= *Dacrycarpus dacrydioides*)
P. ferrugineus (= *Prumnopitys ferruginea*)
Pseudopanax arboreus
P. crassifolius
Solanum laciniatum
Weinmannia racemosa

Adventive

Berberis glaucocarpa

Ulex europaeus

CLIMBERS, LIANES ETC.

Native

Clematis paniculata
Metrosideros perforata
Muehlenbeckia australis

Muehlenbeckia complexa
Parsonsia heterophylla

Ripogonum scandens
Rubus cissoides

GRASSES, RUSHES AND LIKE PLANTS

Native

Microlaena stipoides

Uncinia uncinata

Adventive

Dactylis glomerata

HERBS

Native

Cardamine sp.
Hydrocotyle americana

Hydrocotyle moschata
Ranunculus hirtus

Senecio minimus
Stellaria parviflora

Adventive

Cirsium vulgare
Conyza sp.
Euphorbia peplus
Galium aparine
Ceranium molle
G. robertianum

Gnaphalium sp.
Hypochaeris radicata
Phormium tenax cv.
Plantago lanceolata
Rumohra hispida
Senecio glastifolius

Senecio jacobaea
Solanum nigrum
Sonchus oleraceus
Taraxacum officinale
Vicia sativa

FERNS AND ALLIES

Native

Alsophila tricolor (= *Cyathea dealbata*)
Onoclea sp.
Onoclea sp.
Onoclea sp.
Onoclea sp.
Onoclea sp.

Blechnum discolor
B. filiforme
Lastreopsis glabella
Paesia scaberula
Pellaea sp.
Pteris sp.

Pneumatopteris pennigera
Polystichum richardii
Pteridium esculentum
Pyrrosia serpens
Sphaeropteris medullaris
 (= *Cyathea medullaris*)
